

# Lightning Strikes @ Your Legacy Library

Your Teacher-Librarians:  
Kim Ackerman & Missy Snyder

Issue #5  
April, 2009

## Statistics for Apr 2009

Lessons Taught	<b>82</b>
Classes In LMC	<b>152</b>
Walk-in students	<b>4677</b>
<b>Average</b> students per Intervention	<b>151</b>

## Summer Tech Sessions! Don't miss out.

Adams12 is offering a hands-on, two-day tech conference on June 3rd and 4th called Highway 21. You pay \$25 and attend, & also get two half-days of release time next school year to collaborate on using tech in your classroom and a stipend of \$150!

## Noteworthy collaborations with the Library:

**Iris Heidberg's** German IV class created product commercials using Voicethread using microphones and webcams from the library. Very fun and a great way to get them to speak German!

**Randall Peterson** and **Chris Warner** brought their AS classes in to research an event in the 60's—80's. Students honed their research techniques and were introduced to PhotoStory for their music video requirement.

**Tricia Scow's** advanced AS used bartleby.com, databases and websites to research a poem by an American poet.

**Julie Bucher's** and **Sarah Romero's** Voyager English students chose "Orca Soundings" books (low level, high interest) for their novels of choice and some came back for another when they finished the first!

**Ben Burnett's** Earth Science students used library resources to research global climate regions.

Students attending a session by visiting author **Todd Fahnstock** gave him high marks and learned a lot from his interesting presentations. Students also enjoyed having food & drink in the library!

*To Mr. Jaynes, Ms. Borchardt & your students:*

**Thank you for recycling 1000's of water bottles from CSAP!**

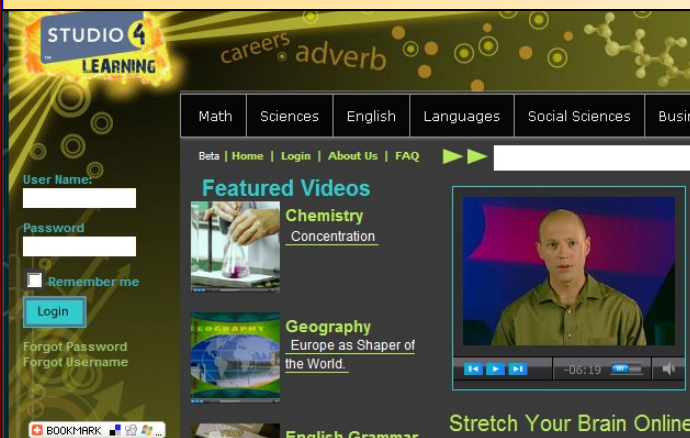

These bottles represent collection from **one** CSAP day.

After teachers collected water bottles during both testing weeks, the students rinsed, removed the caps, and bagged the bottles for recycling. Great job!

## Tech Site of the Month

<http://studio4learning.tv>

Supplement class-room learning with short videos on all academic topics—**FREE!**

Have your students create instructional videos and upload them to the site.

Available at school, at home, anywhere!
