

QR Codes are visual 2-D barcodes that connect to a URL and take the reader to an online document or website. You can can resize the QR codes and put them anywhere.

Students or parents must have a Smart phone with a Barcode Reader app installed to use the QR codes.

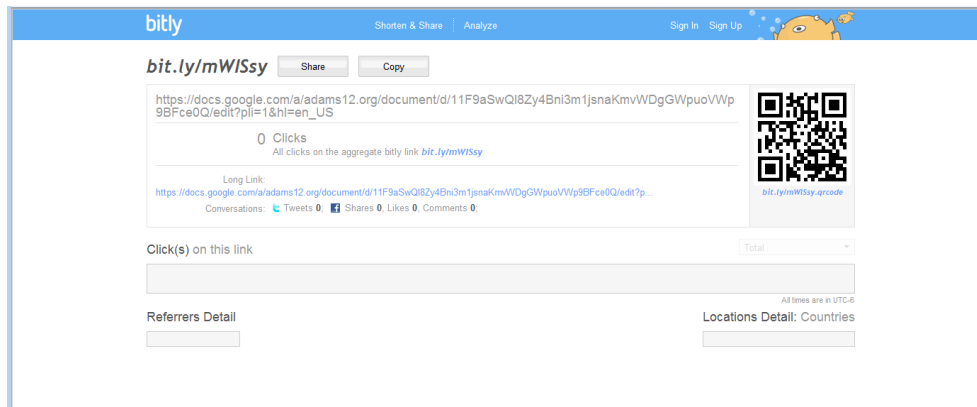

To make a QR code, go to <https://bitly.com/>
Paste your target URL in the blank & click Shorten.

Shorten your URL, then click on the words InfoPage+

See the QR code that results. Copy it (Ctrl + C), then Paste it (Ctrl + V) wherever you want it.

You can resize the codes but don't skew the dimensions (keep it a square).

To read the code, open your Barcode Reader on your cell phone. Hold it up to the QR code and when you hold it very still, you'll see dots flashing until it reads it. When it reads the code, it beeps and then takes you to the URL.
